If breast cancer is not treated at or within the Trust, where are patients referred?

Response:

This information is not recorded centrally and therefore retrieving it would involve a manual search of patient records. The number of drugs dispensed can be given but this is not in relation to the clinical condition being treated as specified in your request. As such we cannot provide this as the cost of locating and retrieving the information exceeds the "appropriate limit" as stated in the Freedom of Information (Fees and Appropriate Limit) Regulations 2004. In order to obtain this information from a number of individual patient records would exceed the £450 limit and is therefore cost prohibitive.

Under section 12 of the Freedom of Information Act 2000, Public Authorities are not obliged to comply with an information request where to do so would exceed the cost limit.
