## **FIRST AID**

Good first aid following a burn or scald can make an enormous difference in recovery times and the severity of scarring.

Two important things to remember are:

# COOL, CALL, COVER

# FIRST AID ADVICE FROM THE BRITISH BURN ASSOCIATION

**1. Cool the burn** with running cold tap water for 20 minutes and remove all clothing and jewellery (unless it is melted or firmly stuck to the wound)

**2. Call for help for any burn larger than a 50p coin** – 999, 111 or local GP for advice

**3. Cover with cling film or a sterile, non-fluffy dressing or cloth.** Make sure the patient is kept warm

STOP, DROP, ROLL

**"Stop, drop and roll"** is used when clothing catches fire. Children can get confused about when to stop, drop and roll. It is important to know when to do this. Children who do not have a good understanding of stop, drop and roll will sometimes do this if they burn a finger or need to get outside if the smoke alarm sounds.

Only use stop, drop and roll when clothing catches fire.

- 30 babies and toddlers go to the hospital with a hot drink burn every day. Keep hot drinks out of reach.
- 60% of all under 3 paediatric burn attendances to Accident & Emergency Departments are due to hot drink burns. Keep hot drinks out of reach.
- 590 children a month require admission to an NHS Burns Service following a severe burn or scald injury.
- 4,609 children under 5 were so badly burnt they were admitted to a NHS specialist burns service last year – over 12 toddlers every day.

- The most common place of injury is the home for children and the elderly. For adults, it's the workplace.
- Did you know hot drinks are the most common cause of burns in children? Something as common as a tea or coffee can have devastating effects.
- Prevention & good first aid are key to reducing the number of burns and scalds occurring each year.
- Irons & Hair Straighteners take longer than you think to cool down - 662+ children (0-14 yrs) last year were treated for burns from them.

**COOL** the burn with running tap water, **CALL** for help, **COVER** with cling film

# SAFETY GUIDANCE IN THE HOME

A burn injury is for life. Being burned or scalded can mean years of painful treatment and, in the worst cases, hundreds of operations to release the scar tissue.

## DO

- ✓ Install smoke alarms on each floor and test regularly
- ✓ Keep hot drinks out of reach of babies and young children
- ✓ Make and practice Fire Escape Plans with the whole family
- Run COLD water first in the bath or sink before adding hot water test the temperature
- ✓ Install thermostatic mixing valves in all hot water outlets
- Keep saucepans at the back of the stove NOT near the front turn handles to the back
- ✔ Keep kettles, irons, hair straighteners or wires out of reach
- ✓ Keep secure fire screens in front of open fires, heaters & radiators
- ✓ Store matches and lighters out of reach
- ✓ Store chemicals, cleaners and acids out of reach

#### DON'T

- X Drink hot drinks while nursing/holding a baby or child
- X Put a baby or child into a bath or sink until the water has been tested
- X Warm baby bottles in the microwaves
- X Leave hair straighteners unattended
- X Allow children near BBQs or garden chemicals
- X Allow children near fireworks
- X Leave children unattended in the kitchen, bathroom or near fires and heaters

#### Prevention of hot drink burns is easy using simple SafeTea rules:

- Keep hot drinks out of reach of young children
- Never carry a hot drink whilst carrying a baby
- Never pass a hot drink over the heads of young children

## Ways to keep hot drinks away from children:

- Place hot drinks at the back of the kitchen surface
- Don't place a hot drink on a table cloth or cloth that hangs down so that a small child can reach and pull it down
- Make a safe place... a SafeTea zone for hot drinks... in your home where you and members of the family and visitors can keep hot drinks from young children
- Avoid drinking hot drinks around small children
- Always remind visitors to your home to 'Keep hot drinks out of reach of the young children'
