FREEDOM OF INFORMATION ACT 2000 – INFORMATION REQUEST

Please provide information regarding the following systems:

1. Clinical noting
2. EPR
3. Finance
4. Finance BI and analytics system
5. Genomics platform
6. HR
7. Patient Engagement Portal
8. Payroll
9. Population health management
10. Procurement Software
11. Video Consultation
12. Virtual Wards

Please enter 'No System Installed' or 'No Department' under supplier name if your trust does not use the system or have the department:

- a) System type –
- b) Supplier name -
- c) System name -
- d) Date installed -
- e) Contract expiration -
- f) Is this contract annually renewed? - Yes/No
- g) Do you currently have plans to replace this system? - Yes/No
- h) Procurement framework -
- i) Other systems it integrates with? –
- j) Total value of contract (£) –
- k) Notes - e.g. we are currently out to tender

Please provide your answer in the above format for each system.

System definitions:

Clinical noting: A clinical noting documentation system that enables the electronic recording, storage and retrieval recording of patient medical records

related to a patient's diagnosis and care during an inpatient hospital visit or encounter.

EPR: An electronic patient/health record is an electronic record of periodic health care of a single individual, provided mainly by one institution. A digital version of a patient's paper chart.

Finance: This is a financial management and accounting solution used alongside HR software. Suppliers here include Unit4

Finance BI and analytics system: Tools used for transforming and analysing financial and related data sets.

Genomics platform: Collects and stores genome data.

Patient Engagement Portal: It is a digital platform used by healthcare providers across the system to securely share data and interact with patients/carers to better support/manage patient's health and wellbeing.

Population Health Management: Population health management platforms cover the set of IT capabilities and related services that enable provider organizations to manage populations of patients and achieve the specific quality, cost and experience goals.

Procurement Software: Procurement software is a business software that allows enterprises to automate their entire source-to-pay cycle. Right from analysing and managing spends to managing contracts and making invoice payments.

Video Consultation: Is a system that is used when a patient speaks to a doctor or healthcare professional using the video camera in their smartphone, tablet or computer.

Virtual Wards: Virtual wards, also known as virtual care wards or hospital-at-home programs, are healthcare models that aim to provide hospital-level care to patients in their own homes. These programs typically utilise telehealth technologies, hardware, and remote monitoring systems to deliver medical care and supervision to patients who would otherwise require hospitalization. Please list the different hardware and systems used.

Please see response attached.
