the next 10 years are will be hard to keep up the pace of work But I think we are up for we are up for it !!!

well done. Outstanding presentation
All your presentations are excellent

Absolutely blown away by all your presentations. So lovely to see and hear how you have all blossomed. You must be so proud x

Carolyn and Sinead, you both supported the PPI panel and helped build the confidence that brought us all to here. Thank you both, you made a huge difference.

Thank you collectively for all of your hard work. The presentations are amazing.

Sharon - the GREAT checklists and vids are a fantastic co-produced resource!! Proud to be involved!

you always believed in us " PPI team" you helped us supported us and where there for us so our thank you MUST go out to all of you.

working with QUB & SWC & U U was a brilliant bit of learning The teachers were very down to earth & extremely open to using the skills of the Service Users

Patricia & joe are some team along with others keep er lit!

I found it great that S U & staff were doing the same training True co-production

We need to have Service users and carers embedded within the controlling minds of our HSC organisations. It is time that Non executive roles on HSC boards included carers and service users as key members

thankyou for mentioning the "great" training Clifford

We need to rethink where we target our PPI efforts at.

i think PPI is now at a point of challenge

BEWARE !!!!! The easy to ignore groups should not be sidelined

very true Sheila, when you see the impact of the users voice on how good a service can be then PPI is essential

Everyone used to think PPI was insurance!

Roberta, You always made room for us and helped move it all forward. Thanks

Communication was key during these difficult and challenging times and this has not been as it should have been - thank you for highlighting this Sheila

It should be shared with colleagues in the Pub Health Agency for distribution right across NI

It would be great to share the video presentations with a wider audience both internally and externally. There is so many key messages that need heard

Going forward

PPI can be translated in a way that everyone understands, that is critical so as people know as Ray says its about 'Having your voice heard' that's what it can be rebranded as

need to look at when we hold meeting if we are to expand membership. Weekends, evenings have to be considered

How do you get independent feedback about PPI and its impact?

Look at how the Trust uses PPI in restarting services that have had to close during covid. How involved are the people who receive services? Monitoring outcomes is just as important as influencing the direction of travel
