17th April 2024

FREEDOM OF INFORMATION ACT 2000 – INFORMATION REQUEST

Question:

Is asbestos present in Lurgan Health and Social Services building? If so, where is it located and how often has this been checked within the last 5 years.

Response:

In line with statutory requirements, the recently completed Asbestos Management Survey of Lurgan Health and Social Services building confirmed the presence of Asbestos in one location- Ground Floor Generator room. It is noted that is an area which the Building's staff do not have access to.

To comply with The Control of Asbestos Regulations (NI) 2012 all identified Asbestos Containing Materials within the SHSCT site are re-inspected at least once a year.
