

Looking in Your Ear

Michelle will look into my ear with a small torch.

I will hear a sound and feel something in my ear.

It doesn't hurt but it feels different.

Mum or dad will put a soft tip into my ear and I will hear some of clicking sounds.

This only takes a very short time.

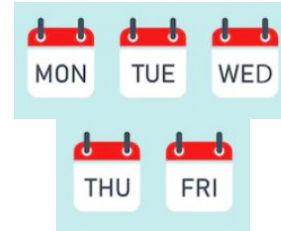

Michelle might put a little sponge into my ear.

She will mix some putty and syringe it into my ear. It will stay there for a few minutes

When I am finished, we will go home.

Going to Audiology

On _____, I am going to the hospital to meet Michelle and her friends

_____ will drive me there.

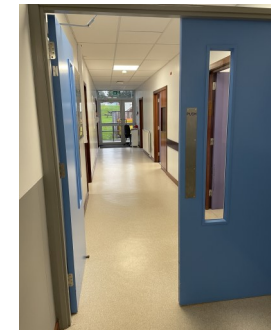

I can bring some toys with me.

This is Michelle. She wears a uniform. She will be happy to meet me.

Michelle or one of her friends will bring me, Mum & Dad down the corridor into the test room

Inside the Room

There is a table in the room with some new toys or I can play with my own toys.

I can look around the room to see all the different things.

Another lady is in the next room

Michelle will sit opposite me. We can look quietly at the toys.

The Game

I will hear a sound. I will turn around and look to where the sound comes from – its an animal in a box!!

There will be more sounds and I will look to where they are coming from. I will see the animals making the sounds.

Sometimes the sounds are loud and sometimes they might be quiet.
